Designer Stephan Hauser worked many years as product designer in the centre of Tokyo for global corporations like Seiko Epson, Honda R&D, Panasonic and LG Electronics as well as many small and medium-sized enterprises in the areas of consumer electronics, home appliances, medical design and capital goods.

In 2008 he joined Yamaha Corporation as Senior Inhouse Designer in Hamamatsu / Japan, where he was responsible for home entertainment products and professional music production equipment for the brands Yamaha and Steinberg.

Today he is present with his own design consultancy EVERDESIGN in his hometown of Freiburg / Germany serving international clients with industrial design service, strategic design consult, concept creation and market research.

WIGGENS CO., LTD.  
2018

EVERDESIGN is a next generation design consultancy.

We are small, highly specialised, globally connected and develop as service provider for strategy, innovation and design, new product experiences and interactions.

We create for our clients capital goods, electronic and consumer products, home appliances, medical goods, packaging, interiors and furniture pieces. We give a form to function, develop solutions for problems and create future visions.

We research potential growth in form of new business and service models for our clients and translate them into tangible innovations.

Clients include german and international brands

Mask for optical navigation during head surgery  
Design by Stephan Hauser  
for Stryker Corporation

*Today, at the beginning of the 21. century, the ability to innovate requires more than ever interdisciplinary thinking. The borders between the common categories product design, user-experience, service model and interaction vanish. An overlapping product-service experience takes its place. Long-lasting consumer goods become short-lived disposables, hardware, software, service experience, real and virtual use, work seamless hand in hand and decide by the quality of their interplay about market success.*

*We will face major changes in central areas:*

- work-life
- medical technologies and health care
- city-life, transport and traffic
- consumption, marketing and customer communication

*As experienced researchers, creators and designers, we offer our partners the most important resources for future tasks and challenges:*

**knowledge, creativity & style**
